## ACTION REQUIRED!

Beginning **October 1, 2019**, Florida Community Care (FCC) will require Electronic Visit Verification (EVV) for Statewide Medicaid Managed Care (SMMC).

**You have two options.** Stay with your current EVV platform and send EVV data to Tellus, or use the full Tellus solution at no charge to your agency.

If you choose the Tellus eVV solution, you can take advantage of an easy-to-use mobile app for care delivery and a web-based console for scheduling and claims processing. Plus, you'll have access to free live and recorded webinars, user guides and video tutorials so you'll be ready and stress-free in October.

**Be prepared.** It's time to make sure your current EVV data can be transmitted to Tellus, or enroll with Tellus. Training on the Tellus eVV solution is available at [tellus.com/training](http://tellus.com/training). Watch your mail for updates.

# Need EVV?

FCC provides access to Tellus caregiver and back-office applications at no charge.

The Tellus platform also includes documented claims submission to FCC. [Learn more about EVV at 4tellus.com.](#)

## FOR CAREGIVERS

Tellus eVV collects all of the required EVV information at the point-of-care with an easy-to-use mobile app.

Training for Tellus eVV is available through videos, webinars and user guides accessible via a comprehensive, online Training and Support Center.

After easy app training, caregivers log in to see daily or weekly schedules and start verifying visits.

With a smart device, caregivers sign in and out on site, checking off tasks and services as completed. The client or proxy sign to confirm.

## FOR OFFICE STAFF

The Tellus eVV solution also automatically checks delivered services against the prior authorization and/or care plans.

If all data points align, the visit is ready to submit to FCC as soon as the visit is complete.

If there is incorrect or incomplete data, **office staff can correct it before the visit is submitted.**

## Already have EVV?

You can continue using your current solution, but your vendor needs to send EVV data to Tellus.

Remember, FCC will cover the cost of the complete Tellus eVV solution, if you choose that option.

## FOR CAREGIVERS

Make sure your EVV solution captures the required information:

- Type of service performed
- Who received the service
- Date of service
- Location of service
- Who provided the service
- When service began and ended

## FOR OFFICE STAFF

As long as your EVV data is being sent to Tellus, you can continue to submit claims the way you are now.
